

Child Safe Blinds

Control Guard

Cord Safety Devices – Our Control-Guard Cord Safety Device is a low cost solution for increased child safety. This simple unit, suitable for roller, roman and vertical blinds, houses the operating chains and cords, and secures against the wall.

Uni Wand

Ideal for Venetian Blinds – If you have young children we encourage you to also consider the small safety features that can be added to your blind, to help prevent cords or chains from posing a potential hazard.

The Uni Wand combines tilting, raising and lowering of the Venetian blind into one control. When the blind is raised, lift cords can be wrapped around the cleats attached to the wand, eliminating free-hanging cords.

Young children can be in danger of strangulation from the loops of pull chain and bead cords that so often run through and operate window coverings

If you have young children we encourage you to also consider the small safety features that can be added to your blind

Push & Pull

Ideal for Pleated Blinds – For pleated blinds, this model is ideal for childrens' bedrooms as the cords are attached to the window sill and the blind is raised and lowered using a handle.

The unique figure of eight cording housed in the bottom rail ensures that the blind will stop in any position.

Wand Control

Ideal for Vertical Blinds – Our Easy Glide system for vertical blinds also eliminates the danger of children becoming entangled in cords as the blind is manufactured with a wand control. Simply pull the wand across your window to open and close the blind. To alter the amount of light entering your room, you can rotate the louvres by twisting the wand.
