

Pleated Blinds

Pleated Blinds

Pleated Blinds are the ultimate tailor-made window dressing option for modern homes. A range of gorgeous fabrics has been hand selected by us to bring warmth and texture to any room in the home, as well as perfect light control and privacy.

We have also harnessed the latest fabric technologies to create a range of energy-saving pleated blinds that reduce heat loss in the winter, and prevent heat gain in the summer. These blinds are ideal for rooms with large expanses of glass such as conservatories or garden rooms.

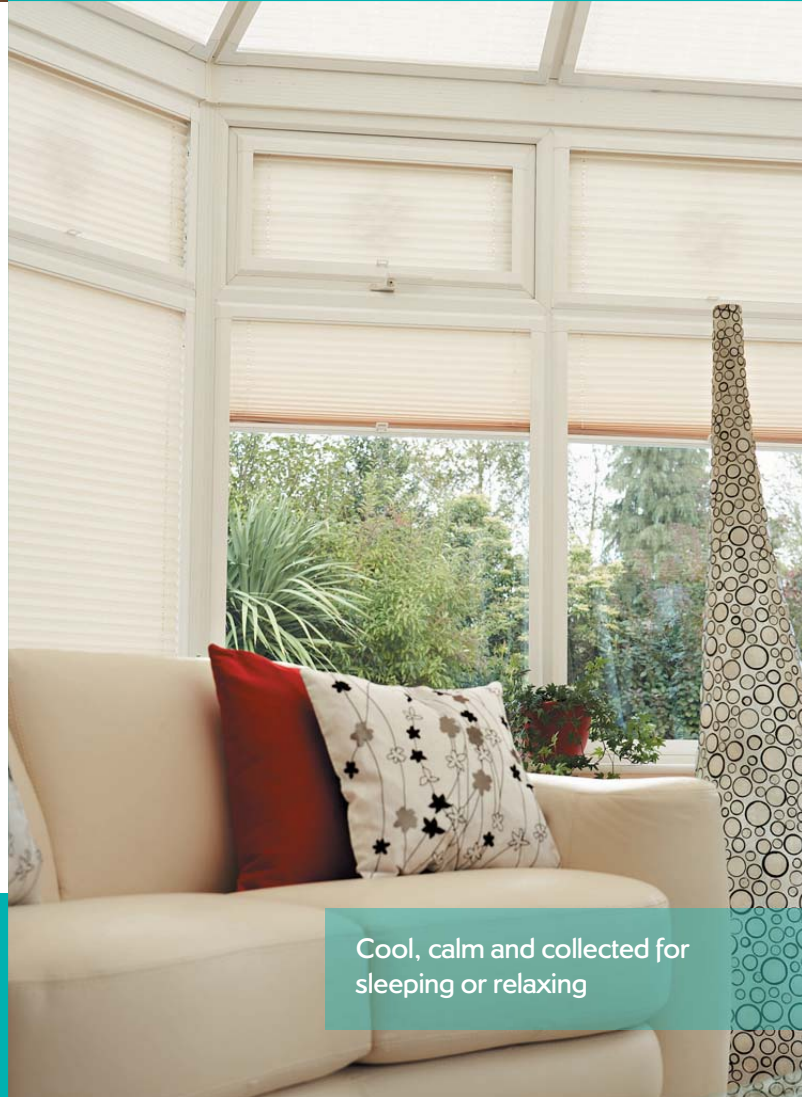

Energy saving fabrics make pleated blinds a practical and stylish option for conservatories

Tailor-made elegance. Perfectly formed for every window

Sleek Styling

The beauty of pleated blinds lies in their ability to be shaped to fit every window precisely, giving a flawless finish even to awkwardly shaped spaces such as roof panels. Easy to use and practical for day to day use, pleated blinds are a popular choice for anybody looking to dress their windows in an uncluttered way.

The range of fabrics and colours within the Shades collection promises to inspire any colour scheme, with calming organic tones or zesty brights to suit your mood and the space within your home. We provide expert measuring, fitting and advice to make sure your windows are professionally dressed from start to finish.
