

Shutters

Shutters

Shutters bring a continental atmosphere to any room, giving instant shade and privacy whilst being flexible enough to open out the way completely to suit the weather or your mood. You can opt for traditional wooden slats, or a painted finish to make sure your shutters are a perfectly modern window treatment for all rooms in your home.

The woods used in Shade's range of plantation shutters have been specially selected for their properties to ensure they stay straight and true, even in humid conditions such as bathrooms or sunny south-facing aspects.

Whether painted or natural, wooden shutters give warmth and privacy

Larger windows or french doors lend themselves perfectly to shutters for an uncluttered look

Simply Versatile

For larger areas such as patio doors or French windows, shutters are a fantastic alternative to curtains. We offer a bi-fold shutter that concertinas away to the side when you wish to use the doors as normal or for days when you are in and out of the garden. For arched or tall windows, why not consider a bistro-style shutter that covers just the bottom part of the window?

Every shutter is made to measure to fit the exact window, with variable slat widths to create different looks. The airy and neat finish of shutters is perfect for any modern home where you want to use light to its full advantage.

The airy and neat finish of shutters is perfect for any modern home where you want to use light to its full advantage
